### Complete Office Fit-Outs

Whether it's a revamp or you've moved office, ensuring the success of your office building's renovation project requires working with a team of professional designers and constructors that can attest an extensive experience in the field. We do just that to create inspiring work places for your team.

### Partitioning Systems

Make the most of the space you have in your business with unique layouts created through partitioning systems that suits your needs. Choose from a variety of different systems depending on your work environment.

### Mezzanine Floors

We provide mezzanine floors manufactured in our factory in the Midlands. As top suppliers, we can provide your business with the space and facilities to display products, accommodate employees or create a range of storage for materials, we have the solution for you.

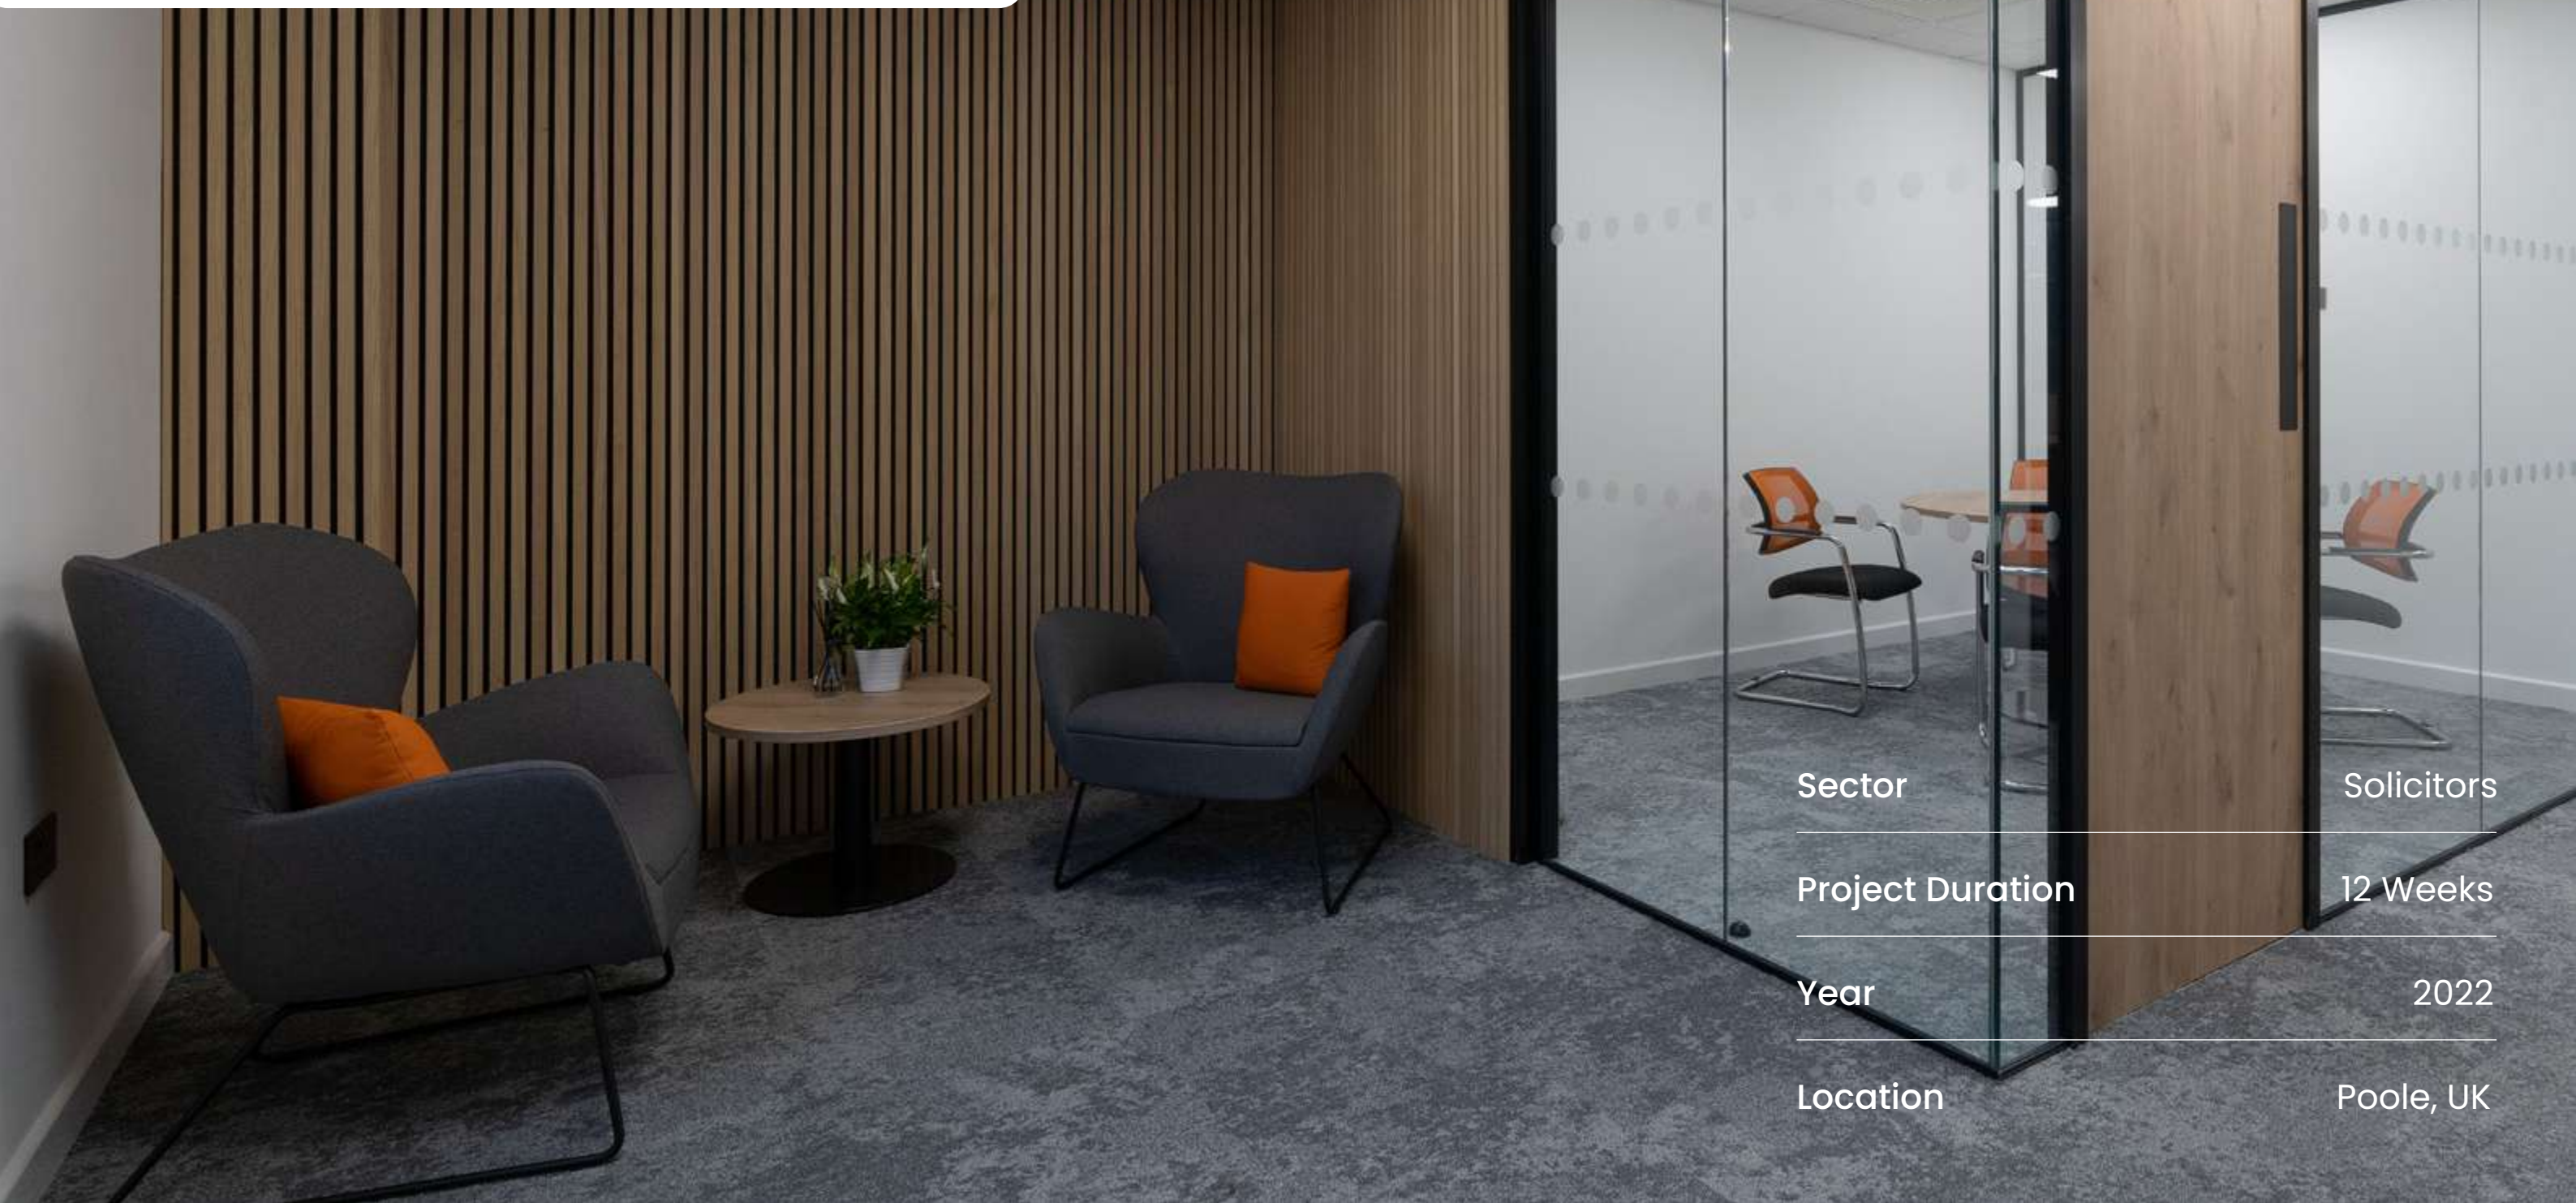

### Storage and Office Supplies

No matter how good the job, without the finishing touches it doesn't have that wow factor. We provide it all including bespoke blinds, office furniture and wall decals to really make the space inspiring for your employees.

Project One

# Kiteleys Solicitors

Sector	Solicitors
Project Duration	12 Weeks
Year	2022
Location	Poole, UK

### The Brief

Solicitor firm - Kiteleys Solicitors came to us after moving into a new office space where they planned to expand the business. They needed a space that was warm and inviting but also practical. We opted for Full Height Komfort Single Glazed Polar and Full Height Chronospan Veneer Doors to create an open plan design that makes the most of the natural daylight. The client wanted a break-away space that allowed staff to get away from their desk, we designed a high-end kitchen specced out with full height storage wall cupboards and an instant hot/chilled/cold tap. The project was a great success and we can't wait to see how they use the space to grow and perform.

**'We were after a full office refurbishment due to the dated state of the new space we had moved into. It has been refurbished to a high standard, with a lot more of an open plan feel. The quality of work was very good and we are extremely pleased with the outcome. We would definitely recommend jade-aden interiors.'**

# Project Two

## RJ Mcleans

Sector	Global Tractor Dealers
Project Duration	6 Weeks
Year	2020
Location	Shaftesbury, UK

### The Brief

RJ Mclean - suppliers of diggers and tractors - required a full fit out of their newly obtained office in Shaftesbury. It came about after the pandemic with safety being a main priority, to tackle this we used glass partitioning to break the space down into individual rooms, reducing noise levels and keeping staff at a distance.

We also installed LED sky ceiling tiles, a stocked bar and kitchen area and a custom digital image wallpaper to show off who they are and what they are about.

The new office design has greatly improved their work environment and helped create a happier workforce.

**“Working with Jade Aden Interiors was a real pleasure and the whole process was made so easy and seamless. We were able to have updates throughout the whole fit-out, and nothing was ever too much trouble.”**

Country  
Germany

Project Three

Sunseeker

**The Brief**

The main requirement for turning the old warehouse shed into a new fit out at Sunseeker was to create a stylish and modern area for the handover of Sunseekers clients new boats, whilst maintaining a budget.

Working closely with the client was key for this project to make sure all details expected from Sunseeker were met by Jade Aden Interiors.

When not being used for a client handover, it has given Sunseeker an extra space to work within whether it be hot-desking or meetings.

Sector	Automotive
Project Duration	8 Weeks
Year	2022
Location	Poole, UK

**“It transformed an old working shed into a client VIP area. An excellent job and all on budget.”**

# Project Four

# Comax

Sector	Wholesale
Project Duration	12 Weeks
Year	2016
Location	Ringwood, UK

## The Brief

One of the largest wholesalers in England, Comax UK Limited came to us in need of a whole office fit out for their new space but more importantly, mezzanine flooring installation.

They specialise in disposables, glassware, crockery and hygiene products meaning they needed a lot of storage in their new office that was safe and manageable for employees to navigate. We split the existing space into levels, installing new staircases and railings that

were open to create an open plan office but in a way that meant it met the highest safety specification. For storage, our team recommended multi-tiered structures and mezzanine flooring.

The office itself was furnished with quality tables, office swivel chairs and technology that the business needed.

Sector

Creative

Project Duration

5 Weeks

Year

2021

Location

Bournemouth, UK

## Project Five

# Outpost FX

## The Brief

The client for this project required a full office refurbishment that was modern and both suitable for both business and entertaining. It was vital that our design reflected the clients tastes while at the same time being practical and sympathetic to the profile and character of their visitors.

Our interior designers set out to create a working and living space that blended modern minimalism with high-end luxury materials

and fixtures, utilising our highest quality products and services.

To add to the recessed lighting and unobtrusive ceiling climate control system, some of the key elements of this design and installation project included glass partitioning complete with the company logo, a fully-fitted kitchen with an instant hot or cold filtered water tap and real hardwood oak flooring for a long lasting professional yet modern look.

Country  
Germany

Project Six

William  
Medcalf

**The Brief**

The main requirement was to create extra space for our clients business which is restoring and selling vintage bentleys. The space needed on the ground floor was used for a showroom type area. The mezzanine created a 2nd floor where he could either work on the cars or store them, thus in turn giving the client an extra dimension to his company.

A lift was put in for ease of transferring cars from the 1st for the 2nd floor and vice versa.

A central aperture was left out of the mezzanine creating a viewing point from above to below.

Sector	Automotive
Project Duration	3 Weeks
Year	2015
Location	Hampshire, UK
